CASIO

fx-83GT PLUS

The most popular scientific calculator in UK schools, with comprehensive features for GCSE maths. A robust design with hard case and a 3 year 'exchange for new' warranty, exclusively from Oxford Educational Supplies.

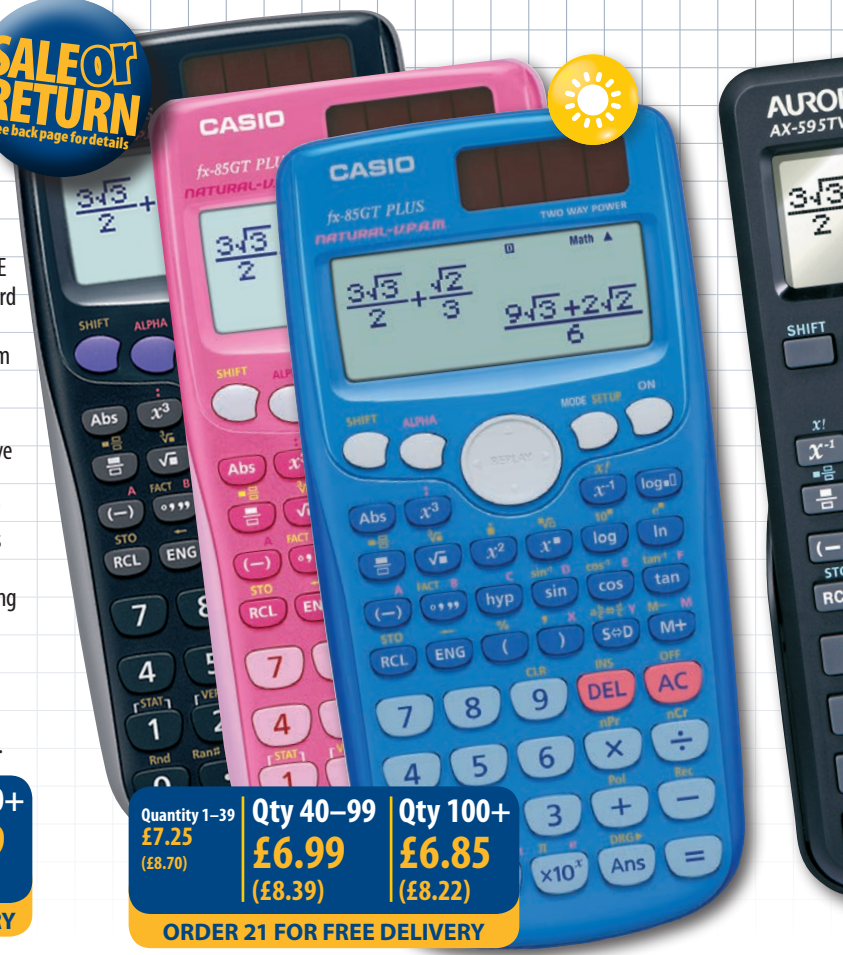

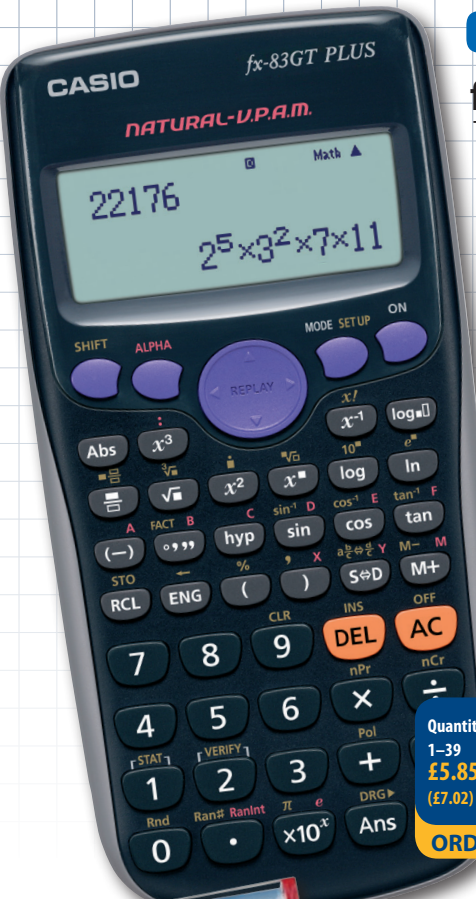

The natural display makes using the FX83GT Plus intuitive from day one of year 7! Enter expressions and data exactly as they appear in text books and with list-based stats, prime factorisation, recurring decimal annotation along with all standard scientific functions, this model may well see your pupils right through secondary school.

TEXAS INSTRUMENTS

TI-30X Pro MultiView

Normal, Poisson and Binomial probability and cumulative distributions, numerical integration and derivatives make the TI-30X Pro MultiView one of the most advanced scientific calculators on the market.

Advanced functions include: Numerical derivative and integration calculation. Editor for entering lists of data. Vectors and matrices. Metric conversions and physical constants. Boolean logic operations. Complex number calculations. Engineering and scientific notations. Metric conversions and physical constants. Octal, decimal, and hexadecimal number bases. Data editor for entering lists of data. List function: to apply a function to a list of values. Radicals shown, to work with simplified radicals and to rationalise the denominator. Exponents with superscript notation.

IN-HOUSE LASER ENGRAVING SERVICE WITH HIGH QUALITY AND FAST DELIVERY!

Secure your school stocks of calculators by selecting one of the distinctive colours of calculator and then engrave with school name, department details or even sequential serial numbers.

For pupils, we can engrave individual names. Everything is done in-house so as not to affect our 24 hour delivery promise.

THE COST IS VERY REASONABLE!

Since our pricing is generally more than 20% lower than retailers such as Tesco, Sainsbury, Ryman and W H Smith you can engrave the calculators purchased from us and the total cost will still be less than retail price in most cases.

The benefits are:

Exam eligibility – Particularly in the case of graphics, JCQ and awarding body guidelines are confusing! Marking eligible models takes away any chance of error, either by pupil or invigilator.

Crest or logo and 2 lines of text on the case or back

Just £1.50 +VAT per calc

ORDER CODE: LASER2

Standardisation – Ensure all pupils have the appropriate technology by ordering centrally and marking calculators

Economy from security! – No more disputes of ownership where identical products are owned by school and pupils.

Ownership – Pupils will value a personalised item and take more care of it.

Serial numbering – We can sequentially number calculators if they are for your own stock allowing accurate inventory control.

School branding – Help to foster pride in your organisation and in mathematics by engraving your logo and department details.

Please note: Some logos do not reproduce well! We will advise suitability upon receipt of your instructions.

How to order:

We simply need to know your choice of calculator, where you would like the engraving and what you would like engraving, preferably in electronic form.

We love to speak to our customers so a quick 'phone call of 2 minutes to 01869 344500 is ideal. Alternatively, an email or school order with print details attached is fine.

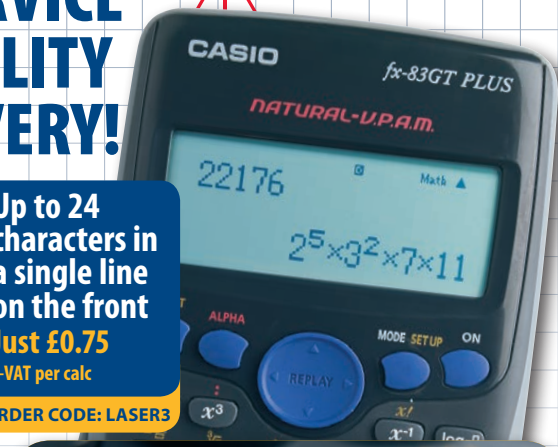

WE ARE DETERMINED THAT THIS SERVICE WILL BE QUICK, SIMPLE AND INEXPENSIVE. PLEASE CALL NOW OR MENTION ENGRAVING AT THE TIME OF ORDERING IT WILL TAKE JUST A FEW MINUTES TO ARRANGE!

CASIO fx-9750G-II

The Casio fx-9750G-II is an established graphical calculator used successfully in mathematics teaching for many years!

With careful development in consultation with teachers and educationalists this latest model offers an even more comprehensive range of functions to enable all students to investigate mathematical concepts further and to stretch the abilities of even the most gifted.

Functions include the ability to graph in terms of x , statistical graph types, metric and imperial unit conversions, number features including lowest common multiple and modulo arithmetic.

Quantity 1-19 **£48.95** (~~£58.74~~)
Quantity 20+ **£47.95** (~~£57.54~~)
ORDER 4 FOR FREE DELIVERY

CASIO GRAPHIC CALCULATOR TRAINING – Get ready for the new syllabuses!

For further information telephone 01869 344500, email info@oxford-educational.co.uk

CASIO COLOUR fx-CG 20

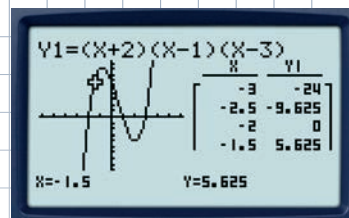

A revolutionary graphing calculator with features that enhance users' understanding of mathematics.

With conventional graphing calculators, students learn by inputting equations to create graphs. The fx-CG 20 creates a whole new way to learn maths by enabling students to experiment by creating their own graphs over pictures of real-life scenes, and then understand the functions that they have created.

High-resolution colour LCD with full textbook-style display. Approved for use in GCSE, AS/A Level, Standard Grade, Higher Grade and Advanced Higher Grade examinations.

One Price Any Qty
£84.95 (~~£101.94~~)
ORDER 2 FOR FREE DELIVERY

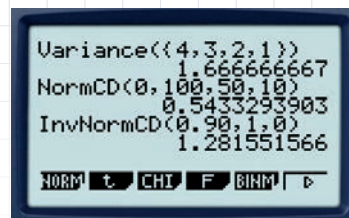

IB EXAM APPROVED.
All fx-CG 20's shipped by OES have operating system V2.02 installed, the only o/s approved by the IB.

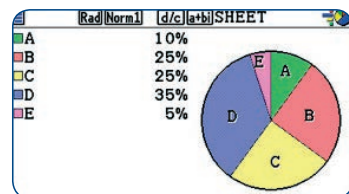

X = f(y) Tabulate values and display graphically equations and inequalities of this format. This is the ideal tool to explore and gain understanding of the inverse of a function.

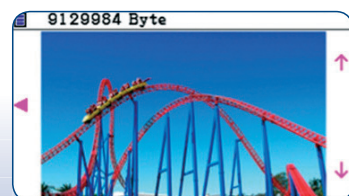

Data graphs Pie charts and bar graphs have been added to the selection of statistical graphing tools.

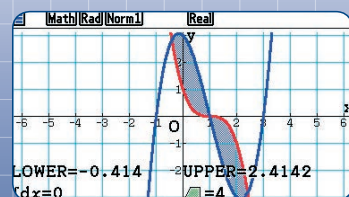

Statistics Single-user commands for data and distribution calculations. This provides a shortcut for students once they are familiar and comfortable with the statistical concepts and the calculator syntax.

Dynamic geometry

Picture Plot enables learning from real-life pictures

Colour screen assists interpretation of complex graphs

CASIO[®] fx-9860GII

ATTENTION ALL IB SCHOOLS!

FX9860G-II is approved for course and exam use but must have the approved operating system. We have the UK stock so please specify "IB version" when ordering.

Features a natural, text book display

The fx-9860GII features a natural, text book display. CASIO's original 'Natural Expression Input Display' and 'Natural Expression Output Display' make it possible to display fractions, exponents, logarithms, powers, and square roots just as they are written in the textbook.

The result is enhanced student comprehension and improved maths class efficiency. The package includes USB connection cable and software. Approved for use in GCSE, AS/A Level, Standard Grade, Higher Grade, Advanced Higher Grade and IB examinations.

Straight-forward PC connection allows screen shots to be incorporated into homework or to be projected via your data projector. Approved for use in GCSE, AS/A Level, Standard Grade, Higher Grade and Advanced Higher Grade examinations.

IB EXAM APPROVED. fx-9860GII's shipped by OES have operating system V2.09 installed, the only o/s approved for IB exams. Please make it clear when ordering that they are for IB use.

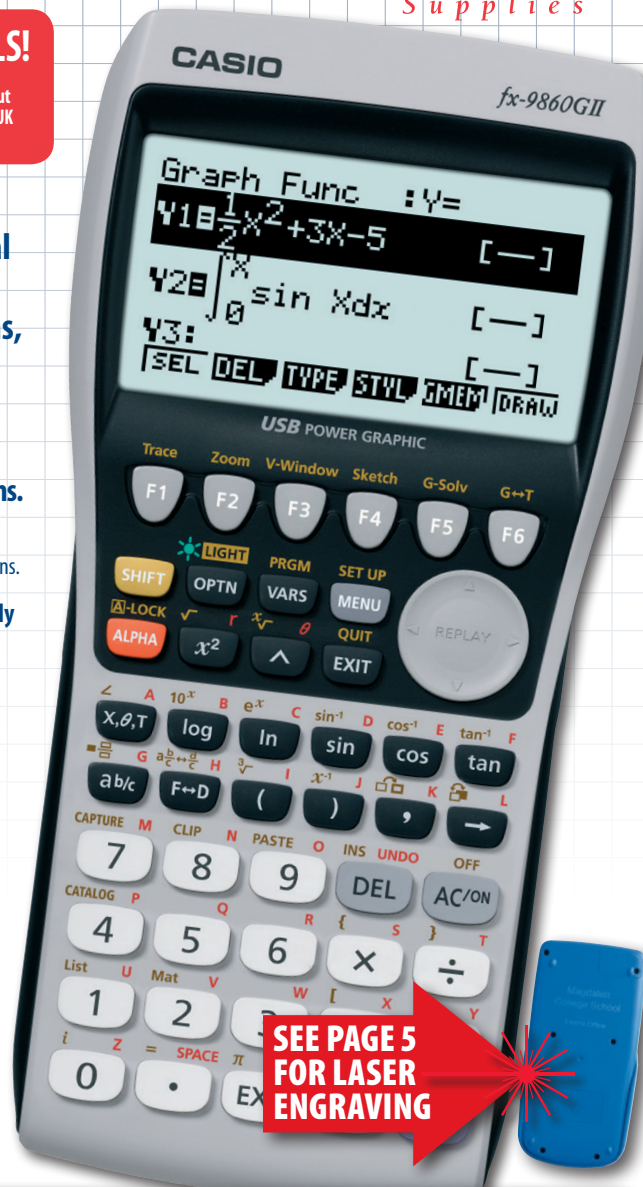

Make a smooth transition for your year 11's to 12 to experience the power of the graphic calculator.

The FX9860G-II is compatible in operation to the FX83GT and FX85GT; keystroke compatibility and intuitive textbook-style display.

fx-9860GII Natural Text Book Display

Natural Display Format

Also supports display of decimal values.

Raised numerator display also is supported.

CASIO

fx-Manager PLUS v2 Emulator Software

New version to match the CASIO fx-9750GII and fx-9860GII graphical calculators. The Casio fx-Manager PLUS v2 software enables all functions and features of the Casio fx-9750GII and fx-9860GII to be performed on a PC then projected onto your IWB.

Also includes screen grab and file transfer features.

ONLY £19.95 (£23.94)

CASIO

CASIO GRAPHIC CALCULATOR TRAINING – Get ready for the new syllabuses!

Oxford Educational Supplies has teamed up with Casio to support schools in providing technology training support for the proposed new AS and A Level mathematics specifications:

"The use of technology, in particular mathematical and statistical graphing tools and spreadsheets, must permeate the study of AS and A level mathematics. Calculators used must include the following features:

- an iterative function
- the ability to compute summary statistics and access probabilities from standard statistical distributions"

(DfE: Mathematics, AS and A level content. Dec.'14)

It is therefore important that through training on graphic calculators you can evaluate how best to use this technology in teaching and learning at AS and A level.

These courses are free and through **Oxford Educational Supplies** we will put you forward to join the training program. The training will assume no prior knowledge of the graphics calculator unless specified prior to the day of training.

The training courses are most suited to A level Maths and Further Maths teachers and will generally be focusing on A-level work. Added to the free training, we have secured the availability of loan products, resources and access to supported pricing terms as a partner school.

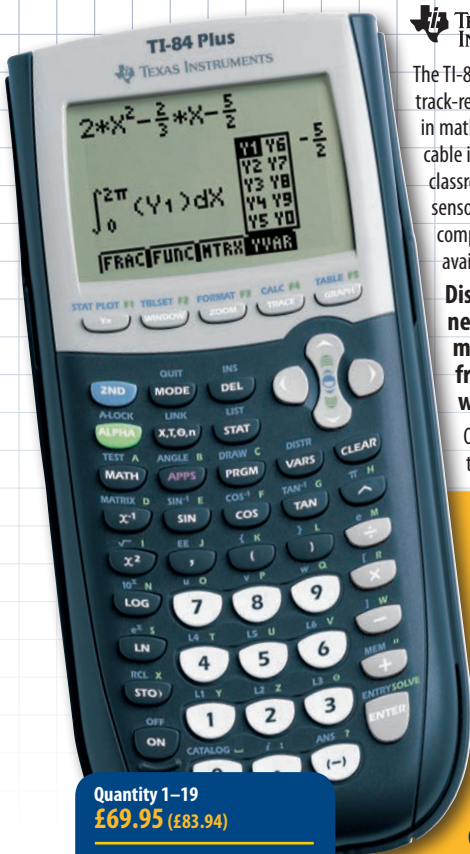

For further information please email info@oxford-educational.co.uk or telephone **01869 344500**, or you can access the Casio Education website: www.casio.co.uk/education/loanandtrain

TEXAS INSTRUMENTS TI-84 Plus

The TI-84 Plus is a graphics calculator with a proven track-record in the classroom and approved for use in maths exams. It has a built-in USB port and USB cable included for connections with computers, classroom display tools and data logging devices and sensors. Includes all the functionality of and is fully compatible with the TI-83 Plus. A library of apps available to upgrade.

Displays in textbook style with new MathPrint™. Input and view mathematical symbols, formulae and fractions exactly as they appear when written in textbooks.

Optional TI-SmartView Emulator Software for the TI-84 Plus family. See below right.

FREE DATA LOGGING EQUIPMENT!

Try calculator-based data logging for free! Our CBR and CBL 2 are great aids to the introduction of practical work into the maths classroom, from 'Walk the graph' with CBR motion sensor to sophisticated physics experiments with CBL 2 using the temperature, voltage and light probes that are included:

One CBR FREE with five TI84 Plus calculators
(Worth £69.95 + Vat)
1 per school.

One CBL 2 kit FREE with 10 TI84 Plus calculators
(Worth £129.95 + Vat)
1 per school.

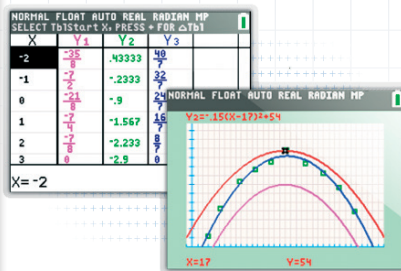

The TI-84 Plus family has advanced graphing capabilities. Choose from a monochrome or high-resolution colour display that makes the visualization of difficult concepts easy, encouraging learning. They are affordable, robust and possibly the most popular.

TEXAS INSTRUMENTS TI-84 Plus CE-T

The newest member of the TI-84 Plus graphing family of calculators. Features full-colour, high resolution screen—now with a new sleek, slim look and super-fast, all new processor!

Featuring a high resolution colour display to clearly differentiate information, improving communication and learning. Photographs may be imported and graphs modelled to them. Grid lines may be added to graphs to improve accuracy of interpretation. Supplied complete with rechargeable battery and charger, eliminating concerns over availability of batteries. This new model is PC compatible allowing files, screen shots of graphs and data lists to be transferred and used in pupil work sheets or homework. USB cable and software is included. Option accessories include a 10 station charging dock for classroom use, CBL 2 data logging interface and a library of user-developed 'Apps'.

Captivating Colour. Optimal Display— Visualise concepts clearly and make faster, stronger connections between equations, data, and graphs in full colour. Enhanced screen readability with high-resolution, backlit display. Distinguish between multiple graphs and plots with colour-coded equations, plots and objects. Make graphs easier to read by adding grid lines.

TEXAS INSTRUMENTS

TI-SmartView Emulator Software

This easy-to-use software complements TI-84 Plus family of graphics calculators, letting the teacher project an interactive representation of the calculator's display to the entire class. It is an ideal tool for classroom projection of maths and science concepts which offers many unique teaching capabilities.

Single-user licence is available as a download

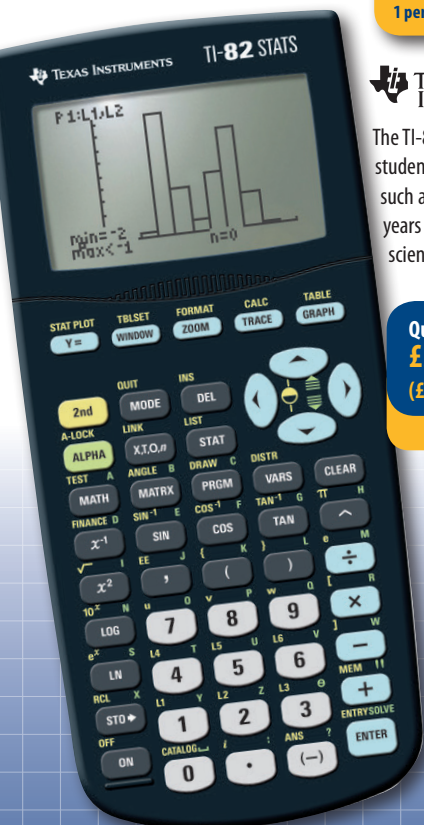

ONLY £49.95 (£59.94)

Multiple-user network licences are also available as downloads from 5 licences upwards from

ONLY £230.00 (£276.00)
Additional licences £46.00 (£55.20) each

NOW INCLUDES TI-84 PLUS CE-T

TEXAS INSTRUMENTS TI-82 STATS

The TI-82 STATS brings benefits in learning mathematics to all students by giving very easy access to sophisticated features such as graphing and statistical charts. Ideal for use from years 7 through 11 this model has all the features of the scientifics with the huge benefit of visualising concepts.

Quantity 1–19 **£36.95** (£44.34) | Quantity 20+ **£34.95** (£41.94)

ALL PUBLIC EXAMINATIONS, INCLUDING IB

SEE PAGE 5
FOR LASER
ENGRAVING

ities and improved interface features, with a choice of has the ability to use images. Graphic calculators make the better understanding of complex mathematical concepts. enabling technology available to all pupils and teachers.

Pre-loaded and free of charge Apps are:

- Cabri™ Jr. App
- CellSheet™ App
- Conic Graphing
- Inequality Graphing
- Periodic Table
- Polynomial Root Finder and Simultaneous Equation Solver
- Probability Simulation App
- Science Tools
- Transformation Graphing App

EXAM MODE: This calculator is fully approved for exam use in it's unrestricted mode. However, for the first time on an approved graphing calculator, functions can be restricted to tailor this calculator specifically for classroom or exam use. Now you can have the power of this advanced device whilst controlling it's use in the classroom whilst restricting its use in the exam room.

Make Real-World Connections Deepen student understanding of maths concepts with images. Import photos from a computer to the calculator and graph on top of the images to create an engaging learning experience.

Use More, Replace Less - The TI Rechargeable Battery conveniently recharges using a USB cable or wall charger (included).

TI-84 Plus C Charging Station
The TI-84 Plus CE-T Charging Station, designed exclusively for the TI-84 Plus CE-T graphing calculator, keeps calculators organized and recharges up to 10 calculators at a time.

Key Features: Recharges up to 10 calculators at a time. Stores calculators as they recharge. Compatible only with TI-84 Plus CE-T graphing calculators.

One Price Any Quantity
£49.50 (€59.40)
ORDER 3 FOR FREE DELIVERY

Familiar TI-84 Plus Family Functionality - The same menu structure and navigation as the TI-84 Plus family make it easy to pick up and learn.

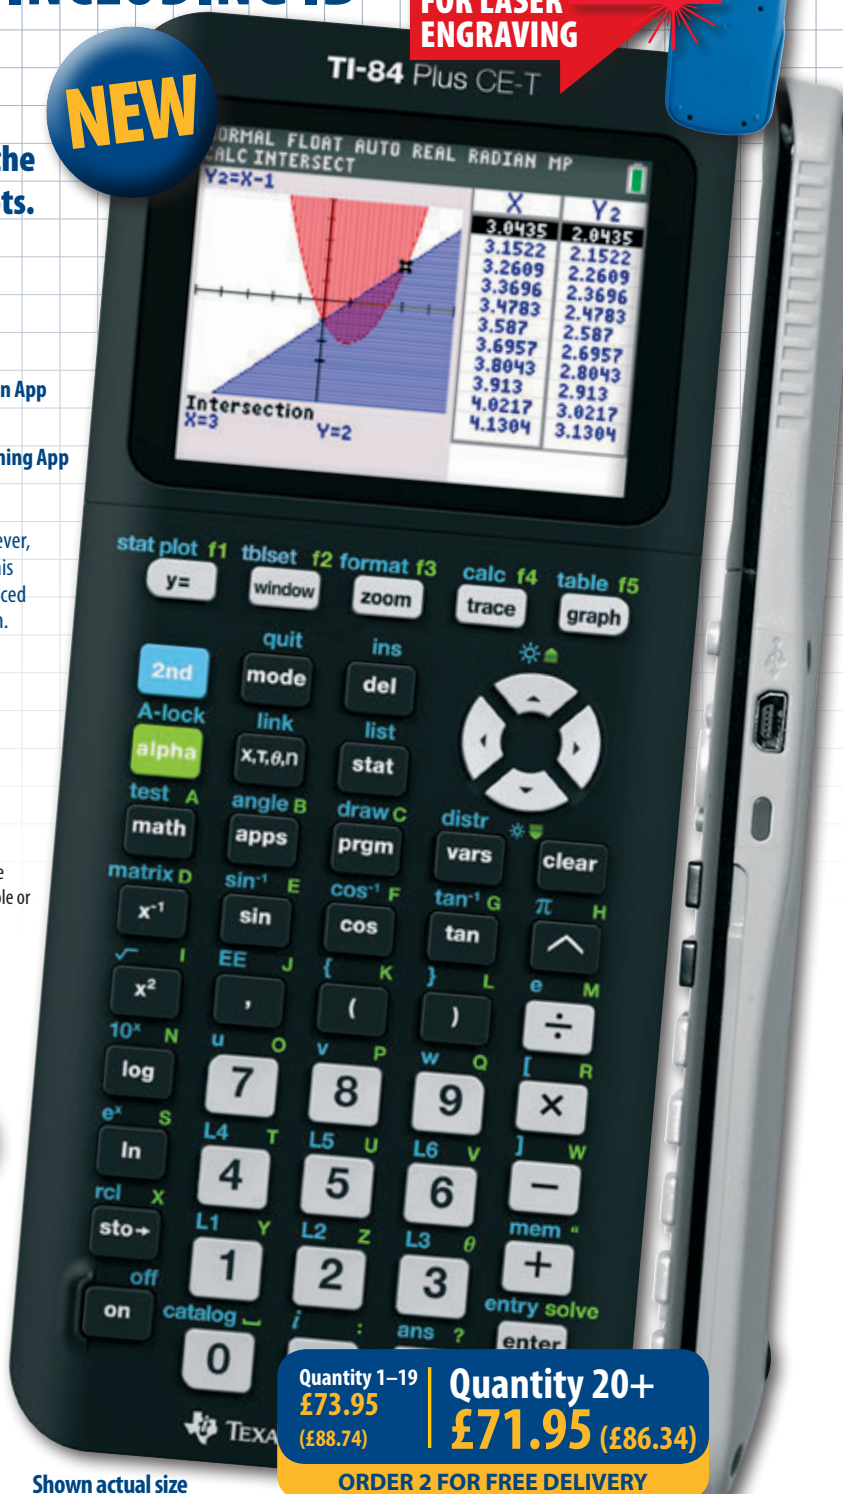

Built-in MathPrint™ functionality allows you to input and view maths symbols, formulas and stacked fractions exactly as they appear in textbooks.

Apps Customize your learning with TI-84 Plus CE-T graphing calculator apps. Just like on your iPhone or Android device, the addition of apps extends the functionality of your calculator, allowing you to perform specific math and science functions and deepen your understanding of concepts. Preloaded apps include: App4Math; Polynomial Root Finder/Simultaneous Equation Solver. Additional apps available: Cabri Jr Geometry; CellSheet; Conics; Inequality Graphing; ProbSim; Test Guard; Transformation Graphing. **Available now at <http://tinyurl.com/odfkq6w>**

GRAPHIC CLASS SETS

The easy way to buy your class stocks of calculators for exam or every day use. Features our 'Secure Stack' inner for a quick visual check that all calculators are present! A Grattnells storage box with foam inner, lid and 10 calculators. Foam inner has 15 slots for securing calculators for safe storage.

Quantity 1-19 **£73.95** (€88.74)
Quantity 20+ **£71.95** (€86.34)

THE EVOLUTION OF HANDHELD CALCULATING...

TI-*n*spire™

The TI-Nspire™ CX handheld and associated software are designed to generate opportunities for classroom exploration and to promote greater understanding of core concepts in mathematics and science.

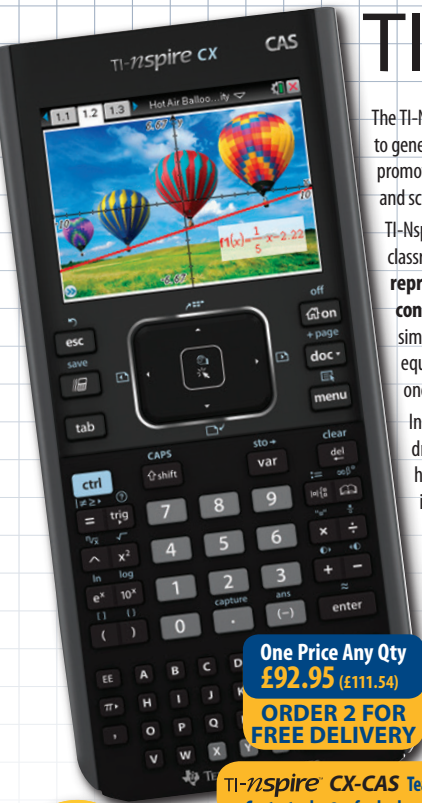

TI-Nspire technology has been developed through sound classroom research which shows that **linked multiple representations are crucial in development of conceptual understanding**. TI-Nspire provides simultaneous, dynamically linked representations of graphs, equations, data and verbal explanations, such that a change in one representation is immediately reflected in the others. In addition to the flexibility offered by TI-Nspire's menu-driven interface and built-in document structure, the CX handheld is enhanced by a backlit colour screen onto which images can be imported, helping bring concepts to life. The handheld is fitted with a rechargeable battery which can be recharged with a USB cable connected to your computer,

the TI-Nspire Docking Station (for the classroom) or a wall charger. Battery life is expected to last up to two weeks under normal use.

Users can experience the same interface on the TI-Nspire CX handheld and in the TI-Nspire Software, enabling integration with existing classroom ICT infrastructure and projection systems to offer whole class teaching and personalised learning opportunities. TI-Nspire works with all major interactive whiteboard technologies.

The new Vernier DataQuest™ application adds functionality for data logging allowing for the collection and analysis of real-life data in all STEM subjects.

Handhelds can be integrated with a TI-Nspire CX Navigator™ system, to give an independent wireless network within the classroom.

Prime Graphing Calculator

Touch-enabled. Full colour. Revolutionary functionality.

HP-Prime - a sleek, slim, brushed metal design that looks great and performs even better! A feature-rich calculating experience with a large 3.5-inch diagonal, touch display.

With the **Advanced Graphing app**, you can plot what other calculators cannot. Graph virtually anything in X and Y including inequalities and conic sections by simply entering the expression and pressing plot.

Powerful applications.

This hardware will not constrain you! You also get an integrated tool suite.

HP Equation Writer supports multiple linear and nonlinear equation solving.

HP Solve is time-saving application that allows you to store equations and solve for variables.

Explore maths concepts with **Dynamic Geometry**, **CAS (computerised algebra system)** and **spreadsheet applications**.

Linked multiple representations are crucial in development of conceptual understanding. Now you can easily switch between symbolic, graphical, and numerical table views of any mathematical expression with dedicated buttons.

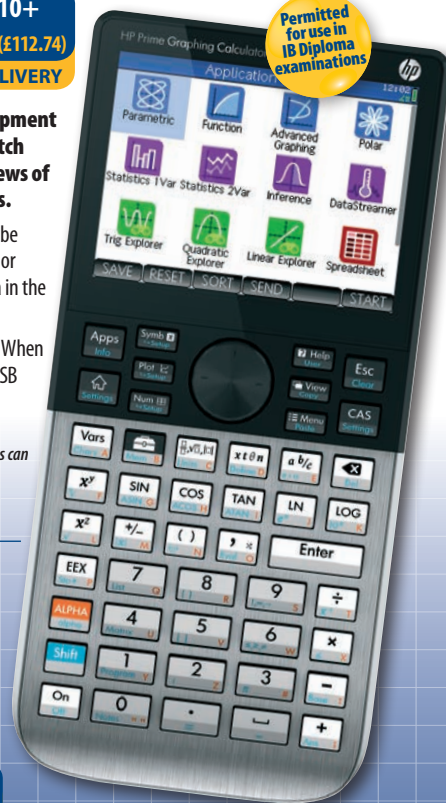

EXAM MODE: For the first time ever each and every function can be turned on or off to tailor this calculator specifically for classroom or exam use. Now you can have the power of computerised algebra in the classroom whilst restricting its use in the exam room.

Be productive longer with the lithium-ion rechargeable battery. When you need to charge up, the convertible charger works with the USB connection on your PC or a standard AC socket.

PLEASE NOTE: Under current JCQ rules HP-Prime may not be allowed in public examinations due to the presence of CAS (Computerised Algebra System). This can be isolated in exam mode and this rule is presently under review.

Quantity 1-9 **£99.95** (£119.94) | Quantity 10+ **£93.95** (£112.74)

Permitted for use in IB Diploma examinations

HP Prime Wireless Kit

Enable wireless one-to-many teaching and classroom interaction.

Improve classroom interactivity and make learning easier with the HP Prime Wireless Kit, which allows teachers to wirelessly push and pull content between the teacher PC and up to 30 HP Prime Graphing Calculators in a single classroom. Create and edit programs, exam configurations, and data sets on the teacher PC and send polls to and receive them from student calculators.

View and project individual student calculator screens to the entire class.

Easy evaluation

Make formative assessment a breeze with quizzes or polls that let you wirelessly send questions to and receive answers from HP Prime Graphing Calculators in real-time.

Starter pack of 30 wireless heads and one receiver modem **£499.00** (£598.80)

The Professor is back!

Little Professor by Texas Instruments

Since 1979 Texas Instruments Little Professor has been entertaining and educating children and many teachers today speak of their own positive experiences with 'the Little Prof'. Accessible to all children from 5 years old and so simple to use – select the level of difficulty, the operator you want to work with and the professor offers batches of 10 questions then delivers your score with a smile!

With over 8,000 randomly generated problems across the four operators and five levels of difficulty, you are ensured plenty of learning fun and he'll even return a smile if you keep him happy by getting the right answers!

LITTLE PROF CLASS SET

Supplied in Gratnells boxes with 'Secure Stack' inner with 30 slots and a lid. Supplied ready to use, as shown aside. No unpacking, no waste!

INTRODUCING einstein™

einstein™ Tablet

The revolutionary, all-in-one einstein™ Tablet+ is the only STEM-focused educational tablet of its kind, a fully featured 7 inch Android tablet in a robust case designed especially for school use.

einstein™ Tablet+ features 8 built-in sensors commonly used in most science curriculums and mathematical functions for analysis and cross-curricular use. Four curve fitting models. Mathematical features including derivative, integrals and much more. In addition, connect up to 8 external sensors simultaneously from over 65 in the einstein™ range. All are plug and play with automatic identity upon connection. Parameters for sensors, sampling rate and experiment duration can be changed at the touch of a finger!

ORDERING ONLINE

www.oxford-educational.co.uk
www.studentcalculators.co.uk

Our on-line catalogue for use by teachers and schools.

PAYMENT

All UK schools have an account with us! An invoice will be sent with goods for payment within 30 days. For private orders we accept cheques, postal orders and all major credit/debit cards.

CARRIAGE

Carriage is free on orders over £150 ex VAT. Carriage will be charged to a maximum of £6.95 on orders of less than £150 ex VAT. Overseas, offshore UK, Highlands and BFPO deliveries carry a carriage surcharge. We will confirm costs before despatch.

CUSTOMER SERVICE

If you need any further information please call Customer Service on 01869 344500.

NO RETURN RETURNS POLICY!

Covering purchases of scientific calculators made from 1st September 2014, we will replace with new, upon receipt of an email picture of the fault and a copy invoice. This policy only relates to scientific calculators and is intended to save teachers time, trouble and expense on the rare occasion that a fault occurs.

There is no change to our comprehensive 3 year exchange for new guarantee that covers all products. In addition, our own brand OES model calculators carry a 5 year warranty. Our guarantee is 'no quibble'. If we cannot repair a product to your satisfaction within 48 hours of receipt we will replace it with a brand new equivalent. We would recommend that you use Recorded Delivery for all returns for your own protection. Please ensure that you enclose a brief letter stating your name and address and the reason for return.

Proud to Support Forever Angels

Oxford Educational Supplies are proud to support a cause very close to our hearts, Forever Angels Baby Home, Tanzania, giving orphaned, abused and neglected small babies and children a chance in life. The home works to bring these children, if possible, back to their families when ready. Filling their lives with the love and attention that all young children need and deserve. A truly incredible place run by volunteers.

Please learn more at www.foreverangels.org

SALE OR RETURN

Guidelines

This is a very simple scheme and we keep the rules as straightforward as possible! Please telephone your order to us stating that you would like 'Sale or Return'. Make a sensible estimate of your requirements and the goods will be despatched to arrive with you the following day.

We do not require a school purchase order at this stage. A provisional invoice and delivery note will arrive with the goods that you hold until the process has been completed. Do not submit this invoice for payment, it is just for information at this stage. The goods can stay with you for up to 30 days without obligation to purchase anything at all! Obviously, we hope you will purchase, and at the end of 30 days you may have sold everything. In this case simply submit the invoice for payment within the next 30 days. Therefore, the complete process can take 60 days, plenty of time and no pressure!

If you do have stock left over we can arrange collection by UPS at £6.95 + VAT per box or you may return small quantities by post. Please use Recorded Delivery, for your own protection. If initial estimates are sensible we rarely find a need for returns and additional stock can be with you very promptly so there is no need to over order.

Extended Credit

Receive the goods now and pay 60 days later. Combined with Sale or Return this is a very useful scheme for use at parent evenings for new intakes or for pupil offers.

Fix the price and ensure all current offers by booking now for delayed delivery on your specified date.

Examination Approval

The majority of the calculators supplied by Oxford Educational Supplies are permitted for use in public examinations and assessments in the UK. The only exceptions are calculators that have in-built Computer Algebra System (CAS) capabilities. In this catalogue this is only the HP-Prime and the Texas Nspire CX CAS. In doubt, please call us or contact your awarding body.

The Joint Council for Qualifications (JCQ) produce the criteria for permitted use of calculators for the English awarding bodies. The Scottish Qualifications Authority (SQA) produces the criteria for permitted use of calculators for all National Qualifications in Scotland. The International Baccalaureate (IB) produces an approved list of graphic calculator models for their Standard and Higher Diploma programmes, available from us upon request or from the IB.

We only use UPS – the world's premier delivery service, to further improve our service to you, our valued customer.
